Title of invention: HAIR TREATING APPARATUS

Abstract: Because process liquid makes stationary portion of apparatus form the blooming which does not collide in shot end of branch front, applicatic of process liquid is limited to only a surface section of hair, and ave waste of processing cost.

This reservoir 2 that reservoir 2 is installed by bearing member 12 abc of warm wind shot end 1 accommodates hairdressing aqua (for example, ar agent of hair) as container having bung hole 13 or pressure gas spray k It is connected five pipe niyotsute between addition bulb 3 controlling this reservoir 2 and spray nozzle 4.

The blooming that it is from transportation wind and spray aqua heated to appropriate adjustment niyotsute of addition bulb 3, suitable temper reaches hairdressing lay from injection orifice 6 flat directly without hitting firm body of anything.
